-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to a percutaneous gas-line having a first and second part.

Group II, claim(s) 11-13, drawn to a method of providing heart assistance to a patient.

Group III, claim(s) 14, drawn to a gas line for connecting an inflatable heart assist actuator to a driver.

1. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
2. There is not a special technical feature common to all the groups that make a contribution over the prior art. A percutaneous gas line having a first part implanted in the patient and a second part partially implanted in the patient is known in the art, as can be seen in the example found in Peters et al. (US Pub 2004/0073080).
3. Furthermore, the special technical feature of Group I, a first part connected to a medical device and a connection fitting; a second part connected to a driver and a connection fitting, is not shared in group II and group III. The special technical feature of group II, a method of assisting the heart, is not shared by group I or group III. The special technical feature of group III, a gas line having an ECG attached to it, is not shared by group I or group II. Therefore, the respective groups lack the same or corresponding special technical features and do not relate to a single general inventive concept.
